

Dylan Santiago

C++ Developer | AI Engineer

📍 NY 📞 516-859-1806 ✉ notfennecks@gmail.com 🌐 dylansantiago1 🔄 notfennecks

EDUCATION

Master of Science in Computer Science,
SUNY Polytechnic Institute
01/2023 – 05/2024
Utica, NY
Specialization in Artificial Intelligence
GPA: 3.3

Bachelor of Science in Interactive Media and Game Design, SUNY Polytechnic Institute + SUNY Canton
08/2018 – 12/2022
Utica, NY | Canton, NY
GPA: 3.65

SKILLS

Unreal | GitHub |
C++ | C | Java |
Python | HTML/CSS |
Communication |
Organization | Excel |
Data Analysis |
PyTorch |
Machine Learning

CERTIFICATES

Computer Animation,
GC Tech BOCES - 2018
06/2018 | Levittown, NY

AWARDS

President's List,
SUNY Canton, Poly
08/2018 – 12/2022

LEADERSHIP ACTIVITIES

Esports Team Manager
SUNY Canton
Game Design Club Secretary
SUNY Canton

SUMMARY

Data Scientist and Computer Science professional with a Master's degree specializing in Artificial Intelligence and hands-on experience developing machine learning models, analyzing complex datasets, and implementing AI solutions. Proficient in Python, C++, PyTorch, machine learning, reinforcement learning, and data analysis. Combined technical and investigative experience through machine learning research and public-sector law enforcement, including evidence evaluation, investigative analysis, report development, and communicating complex findings to technical and nontechnical audiences.

MASTER'S THESIS

Human-Inspired Crowd Dynamics Learning For Agent-Based Crowd Control,
SUNY Polytechnic Institute - 2024

- Designed and implemented machine learning models using Unity ML-Agents to simulate realistic crowd behaviors, applying reinforcement learning to dynamic environments.
- Analyzed large, complex datasets and developed algorithms capable of adapting to evolving scenarios, enhancing decision-making accuracy in real-time simulations.
- Investigated simulation model vulnerabilities and developed scalable, modular solutions that improved adaptability, efficiency, and realism.
- Planned, organized, and executed research experiments involving multiple AI training algorithms balancing competing computational constraints to achieve optimal performance.
- Communicated technical findings through written reports, data visualizations, and formal presentations, translating complex results into actionable insights.

PROFESSIONAL PROJECTS

Mental Health Machine Learning Model, *Python - 03/2023 - 05/2023*

- Developed and trained a neural network model to identify students at potential risk for mental health challenges.
- Applied advanced data analysis, feature engineering, and optimization techniques to improve predictive accuracy.
- Validated model performance through testing and uncovered key risk factors contributing to student well-being.

Game Developer, Tenth Circle. Unreal Engine

09/2020 – 12/2020

- Conceptualized and developed a 3D zombie survival game independently, tackling numerous technical challenges.
- Innovated creative solutions to overcome technical hurdles, ensuring the project to successful completion.
- Demonstrated resourcefulness in implementing game mechanics, optimizing performance, and resolving bugs.

Software Developer 📧, *GameMatch*

08/2026 – 09/2026

- Developed and deployed an end-to-end machine learning recommendation system in Python across ~95,000 Steam games using TF-IDF, cosine similarity, NLP/text processing, feature engineering, and weighted ranking algorithms.
- Designed a scalable data preprocessing and ML pipeline with pandas, NumPy, scikit-learn, and SciPy, combining structured metadata and unstructured text to generate personalized multi-game recommendations.
- Optimized application performance, memory efficiency, and deployment architecture using sparse matrices, precomputed model artifacts, caching, and on-demand inference, reducing the production dataset by over 90% (487 MB → 35 MB).

WORK EXPERIENCE

Police Officer, NYPD - 40 hours per week - 10/2024 - Present - NY, NY

- Conduct interviews, collect statements, and evaluate evidence to determine facts, establish timelines, and make sound enforcement decisions.
- Resolve a wide range of problems in the field by assessing risks, identifying practical solutions, and adapting to rapidly changing circumstances.
- Manage multiple assignments at once, from emergency calls to ongoing investigations, while ensuring reports are completed accurately and on time.
- Operate effectively in diverse and unpredictable environments, maintaining composure and sound judgment under pressure.
- Prepare detailed written reports and deliver verbal briefings to supervisors, prosecutors, and partner agencies to support investigations and prosecutions.

Camp Operations Coordinator,

Indian Ladder Farms - 30 hours per week - 03/2023 - 08/2023 - Altamont, NY

- Managed smooth day-to-day operations of summer camp and completed necessary administrative tasks for camp operation.
- Planned and facilitated engaging indoor and outdoor learning activities for diverse groups, fostering a positive, safe, and enjoyable environment for participants.
- Served as a reliable resource, stepping in as an emergency substitute teacher when necessary, exhibiting flexibility and adaptability to meet evolving needs.
- Fostered high employee and child satisfaction through effective communication and problem-solving, maintaining positive morale and relationships.
